1
ECOSYSTEM TO PROTECT

Each island contributes its own knowledge and experience.
The partners apply them in the field and improve them together.

FROM MALTA TO SICILY

The drone and digital tool techniques developed in Malta enhance the habitat restoration and conservation activities already underway at the Sicilian project sites.

The partners test actions to tackle invasive species, prevent wildfires and support biodiversity recovery, comparing results across the different project sites.

FROM SICILY TO MALTA

The practices developed in Sicily for wildfire prevention are shared and integrated into the strategies adopted in Malta.

Protecting the Mediterranean maquis is a shared challenge.
The most effective solutions can be shared and become a valuable resource for the entire Mediterranean.

THE EUROPEAN VALUE OF INTERREG

THE INTERREG ITALY–MALTA PROGRAMME, FUNDED BY THE EUROPEAN UNION, CO-FINANCES PROJECTS SUCH AS MEDMAQUIS, ENABLING ORGANISATIONS FROM BOTH COUNTRIES TO WORK TOGETHER, EXCHANGE EXPERTISE AND DEVELOP COMMON SOLUTIONS TO SHARED CHALLENGES.

Two territories.
One shared natural heritage.
One common challenge.

MedMaquis is a project co-funded by the European Union under the Interreg VI-A Italy–Malta Cooperation Programme.
